

PRESS RELEASE - Söderköping, January 2012

## **New remote controlled HTC grinder for maximum efficiency**

**HTC is celebrating its 20th anniversary as a supplier of grinding machines and in connection with this, the remote controlled grinding machine HTC 800 RX is being launched. The HTC 800 RX uses the same reliable technology as the larger HTC 950 RX and it is similarly equipped, with a battery and an extra wheel for transport. The HTC 800 RX, just like the HTC 950 RX, is a powerful and efficient machine. In addition, the machine's width of 860 mm means it can pass through all standard doors.**

The remote control makes the machine very easy to use and it minimises the risks for work related injuries. Without interrupting the grinding, the operator can also handle telephone calls, the dust extractor and other surfaces on the premises, which doubles the capacity. Moreover, the HTC 800 RX is equipped with HTC's patented and well-known drive system, with 2-year warranty. Furthermore, it is equipped as standard with: MCS™, floating cover, integrated weight system, EZchange™ and it has a foldable handle that facilitates grinding in cramped spaces.

### **MCS™ (Mist Cooler System)**

A small detail that makes a huge difference. The HTC 800 RX is equipped with the unique MCS™, which cools the tools and maintains their sharpness over time. This is decisive on hard floors where some tools can "glaze". With MCS™ you obtain the maximum performance from your tools with perfect stripping and up to 30% longer service life for your tools.

### **Floating cover**

Together with the dust extractor HTC 80 iD, the floating cover prevents the dust from spreading in the building. The floating cover can also improve the tools performance further, since the tools can work without needing to plough through the dust on the floor.

### **Total solution**

Together with the existing grinding machines HTC 1500 ixT, HTC 950 RX, HTC 650 RX as well as the recently launched dust extractor HTC 80 iD, HTC is now the first supplier in the world to offer a unique industrialised concept for floor grinding.
