## ReadSoft's Platinum Partner BCSYS and ReadSoft France launches invoice automation solution for Microsoft Dynamics NAV

BCSYS, a Gold Certified Microsoft Partner and a ReadSoft Platinum Partner, has together with ReadSoft created a packaged document automation solution called BCSYS EDOCS. It is based on ReadSoft's product INVOICES and a connector that allows integration and process automation within Microsoft Dynamics NAV. The solution is offered on the French market and will be available either on premise or on the cloud as a Software as a Service (SaaS) via ReadSoft Online.

BCSYS EDOCS for Microsoft Dynamics NAV offers the possibility for Microsoft's ERP customers to automate the complete supplier invoice process. ReadSoft's partner BCSYS has developed an added-value module that is fully integrated with Microsoft Dynamics NAV. The first part of the process is ensured by ReadSoft's product INVOICES either on premise or on the cloud (SaaS) with ReadSoft Online, which is using Microsoft's Azure platform. The processed invoices can be stored within Office 365, SharePoint or other kind of archive solution.

BCSYS EDOCS allows customers to rationalize their supplier invoices process and to be more efficient. The benefits are reached thanks to the complete solution that combines data capture, invoice matching/PO (Purchase Orders), approval workflow and archiving.

"The considerable demand on the French market and ReadSoft's world-leading solution gave us the opportunity to create a packaged document automation solution. ReadSoft's solutions are the only ones that are available either on premise or online. In combination with the advanced Microsoft technologies they allowed us to build this value-adding add-on solution," commented Roger Ballouz, BCSYS Managing Director.

"The solution developed by BCSYS covers Microsoft Dynamics NAV customers perfectly. First of all, these solutions are using Microsoft technologies to guarantee the data transfer between ReadSoft and our ERP. In addition, this allows customers to continue to use their Microsoft Dynamics NAV user interface for invoice automation," commented Virginie Garlasain, Microsoft Dynamics Product Manager in France.

"The BCSYS approach in combination with the ReadSoft solution that is using our cloud services Microsoft Azure creates a flexible and secure end-to-end solution. The native compliance within SharePoint and Office 365 ensure companies to take benefit of the latest features of our offer," commented Julien Lesaichere, Windows Azure responsible in France.

BCSYS will be the reseller of ReadSoft's solutions to Microsoft Dynamics NAV partner network in France. BCSYS is a ReadSoft Platinum Partner with full capabilities to do implementation and support on ReadSoft's solutions.

“We are very happy with the work done by BCSYS and the quality of the solution proposed to Microsoft Dynamics NAV customers,” comments Per Åkerberg, President and CEO of ReadSoft. “The solution BCSYS EDOCS is one of the first solutions using the label “Powered by ReadSoft” to be available either on premise or on the cloud as a Software as a Service via our company ReadSoft Online,” finishes Per Åkerberg.
