Precise Biometrics Announces Partnership with FedSolve

Precise Biometrics' partner community continues to grow with FedSolve partnership

Precise Biometrics today announced a partnership for mobile solutions with FedSolve, a 100% minority owned systems integrator and reseller. FedSolve's capabilities in the IT Services area and extensive contract vehicle portfolio will greatly expand the ability for Government Agencies to easily acquire and implement strong authentication solutions.

"We are very excited to announce our partnership with FedSolve," says Precise Biometrics' CEO, Thomas Marschall. "We are expecting that the mobile security market will see a triple digit market growth for emerging authentication technologies in 2012. With this surge, we are seeing more and more potential for all of Precise's offerings, and need partners like FedSolve to service this growing demand."

"A strategic partnership between Precise Biometrics and FedSolve simply makes sense. With Precise Biometrics mobile casing and identity authentication system and FedSolve's extensive experience as a Federal government VAR to both civilian and DOD agencies - we are prepared to win opportunities based on the smart casing in 2012 and beyond, using our GSA Schedule, SDB status, and other contract vehicles," says Robb Wong, CEO, FedSolve, LLC

Precise Biometrics smart casing fulfills a need for users who want to access secure networks or services using their mobile device, but are restricted from doing so because they cannot authenticate as required. The product is designed to fit seamlessly over the device, filling a void in the mobile security arena by enabling developers to build smart card, fingerprint authentication, or both, into virtually any type of app for the most popular mobile devices. At the same time, the smart casing makes authentication easier and more convenient for users.

About Precise Biometrics

Precise Biometrics is a market-leading provider of solutions for fingerprint recognition to prove people's identities. With top-of-the-line expertise in fingerprint verification, Precise Biometrics offers fast, accurate and secure authentication of a person.

The technology adds value to ID, enterprise and bank cards as well as access to mobile solutions, computers and networks. Precise Biometrics serves business and government organizations throughout the world and its technology is licensed to close to 160 million users.
